Easy/Economical Litter Box System

Tractor Supply Co. Pine Pellet Stall Bedding, 40 lb

Pet Training Pads, 22 x 22

Purina Tidy Cats Breeze Litter System

Van Ness High Sides Cat Litter Pan-Giant

A metal scoop is an effective tool for scooping pine pellet litter.

OR

SiftEase Litter Sifter + Bin

Directions:

1. Discard the breeze system drawer tray, litter pellets and the pad refill (not needed)
2. Place one training pad inside the Van Ness litter pan.
3. Place the Breeze litter system (without the tray drawer) backwards inside the Van Ness litter pan.
4. Pour enough TSC pine pellet bedding into the Breeze System litter pan to cover the slots.
5. Scoop daily the poop.
6. After at least one week (maybe more often depending on how many cats that you have) empty the bottom box (Van Ness) and replace the training pad.
7. Add more pine pellets as needed. The EKO stainless steel container is great to store the pellets)

- Initial set up may be a bit costly but the savings on cat litter is worth it and healthy for your precious fur-baby!
